

# Abdullah Yosufzai

Software Engineer

## ABOUT ME

As a web developer with over 4 years of experience, I have honed my skills in Python, JAVA, PHP and web development to deliver high-quality, efficient solutions. I am passionate about creating innovative and user-friendly software, and I thrive in collaborative, fast-paced environments. With a strong foundation in both backend and frontend development. Proficient in various platforms, languages, and embedded systems. Able to effectively self-manage during independent projects, as well as collaborate as part of a productive team. A creative thinker, adept in software development and working with various data structures.

## EDUCATION

**Bachelor**  
Computer Science  
Kabul University  
2018-2022

- Skilled in utilizing various software development tools and frameworks
- Familiar with cloud computing and virtualization technologies
- Proficient in developing and implementing algorithms for artificial intelligence applications
- Experienced in designing and implementing scalable and secure systems
- Strong problem-solving and analytical skills
- Excellent communication and teamwork abilities gained through group projects and collaborations

## SKILLS

HTML	MySQL
CSS	Machine
Bootstrap	Learning
Tailwind	Data Analysis
JavaScript	Data
JQuery	Visualization
AlpineJS	Flutter
PHP	Python
Laravel	Java
FilamentPHP	

## LANGUAGES

Dari/ Persian	<div></div>
Pashto	<div></div>
English	<div></div>

## WORK EXPERIENCE

**Web Developer**  
Ramaki Group of Companies Jan 2021 - Present

As a web developer at Ramaki Group of Companies, I am responsible for designing, developing, and maintaining web applications using PHP Laravel framework. I work extensively with MySQL database to ensure seamless data management and retrieval. My role also involves collaborating with cross-functional teams to understand business requirements and translate them into functional and user-friendly web solutions. I am proficient in front-end technologies such as HTML, CSS, and JavaScript, and have a strong understanding of web security and performance optimization. I am passionate about staying updated with the latest web development trends and technologies, and strive to deliver high-quality, scalable, and maintainable code.

## PROJECTS

**Beta**  
Beta is a Management Information System (MIS) developed using PHP for a factory and products management. The system allows for the efficient management of all aspects of the factory, including inventory, production, and sales. It provides real-time data on product availability, production schedules, and sales trends, allowing for better decision-making and resource allocation. The system also includes features for tracking raw material usage, monitoring equipment maintenance, and managing employee schedules. With its user-friendly interface and customizable reporting tools, the MIS system has greatly improved the overall efficiency and productivity of the factory operations.

**Prism**  
Prism is a Management Information System (MIS) developed using PHP Laravel for our distribution company to efficiently manage and distribute our products. The system includes features such as inventory management, order processing, and sales tracking to streamline the distribution process. With the MIS, the company can easily track product availability, monitor sales performance, and manage orders from different clients. The system also includes reporting and analytics tools to provide valuable insights into product performance and distribution trends. Overall, the MIS has greatly improved the company's ability to manage and distribute their products effectively.

**SarafApp**  
SarafApp is a revolutionary new application that I developed for easily exchanging money with friends, family, and colleagues. With SarafApp, users can quickly and securely send and receive money without the need for cash or complicated bank transfers. The app allows for seamless transactions between individuals, making it perfect for splitting bills, repaying loans, or simply sending gifts. With its user-friendly interface and advanced security features, SarafApp is the go-to solution for hassle-free money exchanges. Whether you're out for dinner with friends or need to reimburse a coworker, SarafApp makes exchanging money a breeze.

**Shop Management**  
I contibuted and developed a comprehensive shop management system using the latest version of Laravel. This project allows the owner to efficiently buy and sell products, as well as monitor daily, monthly, and yearly sales and profits. The system incorporates user-friendly interfaces for managing inventory, processing transactions, and generating detailed sales reports.
